

# Securely Connect 100 Million Square Miles

## PACAF SD-WAN

Software defined (SD) networking technology that uses a centralized control function to direct traffic across wide area networks (WANs) and to cloud providers. Easily configure, monitor, and manage the entire network!

- Optimize traffic
- Multiple transport options
- Quickly add new bases
- Integrate with cloud services
- Adjust bandwidth allocation

### Rapid Solutions

AF CyberWorx reduces project timelines by 64%

### Project Timeline

July 2024 - Present

### SAF/CN Funded

\$7.8 MILLION PROJECT

### Industry Partner

Iron Bow
